Learn to draw the bass clef

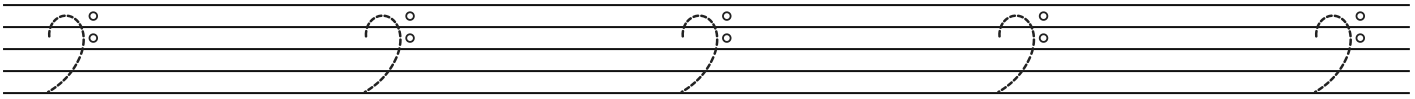

Printable worksheet · teoriamusical.com.es/en

How to draw it: start with the big dot on the **4th line**; go up and curve to the right; come down in an arc to near the 1st line, like a big comma; and place the **two dots** to the right, one above and one below the 4th line. The two dots are what tell you where F is: if you put them on another line, it is no longer an F clef on the 4th line.
Draw it with a thin line, without lifting the pencil. In printed scores the clef looks thicker because it is engraved, but by hand it is done this way.

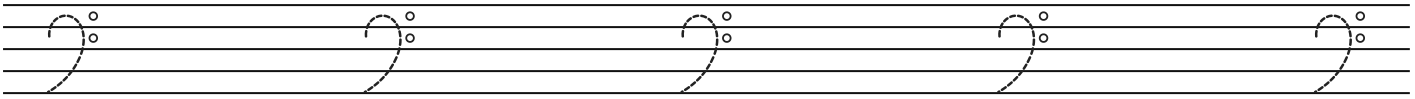

1. Look at the model

2. Trace the dots

3. Trace the dots again

4. Looser dots

5. Looser dots again

6. Looser dots

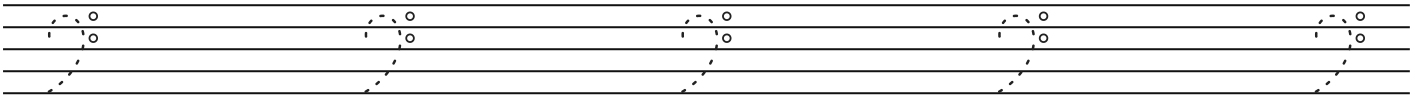

7. Looser dots again

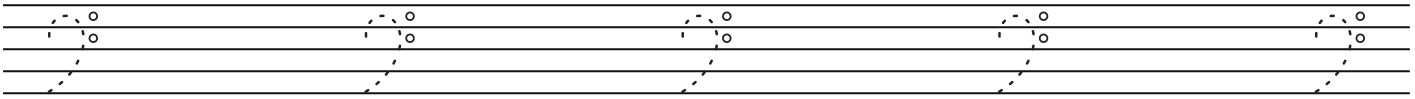

8. Looser dots

9. Almost without help

10. Almost without help

11. Only the reference dot

12. Draw it yourself
